Netflix User Behaviour and Engagement Analytics using SQL

Presented By:
Shinde Omkar Bhagvat

Problem Statement

- ❑ Streaming platforms generate massive user data
- ❑ Businesses need insights to improve content strategy
- ❑ Netflix must reduce churn and increase engagement
- ❑ SQL analytics is used to answer business questions

45:09

SUB TOPIC Part 1

Project Objectives & Key Analysis Areas

- ❑ *Top 10 Most Engaging Shows*
- ❑ *Customers Rank by Engagement Level*
- ❑ *Monthly Watch Time Growth*
- ❑ *Top Shows Within Each Genre*
- ❑ *Calculate Customer Lifetime Value (CLV)*
- ❑ *Identify Binge Watchers*
- ❑ *Analyze Cancellation Rate*

45:09

SUB TOPIC Part 1

Dataset Overview

Database contains 4 main tables:

Table	Description
Customers	User details
Subscriptions	Revenue & status
Netflix_Content	Movies & shows
Viewing_History	Watch activity

Dataset size:

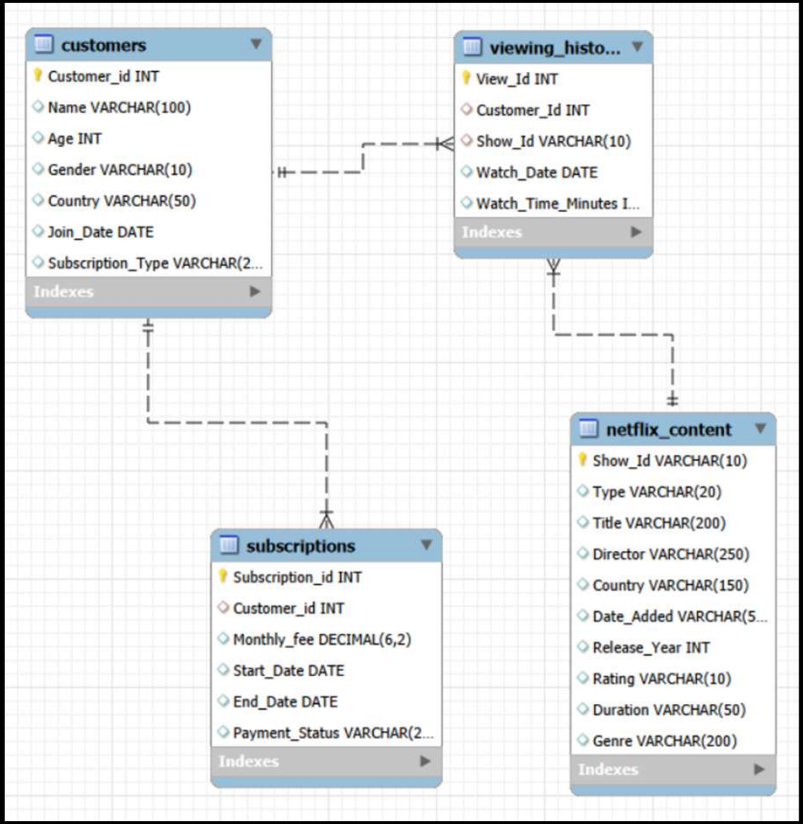
- 250 customers
- 1000 viewing records

45:09

SUB TOPIC Part 2

ER-Diagram :

- One Customers -> Many Subscriptions
- One Customers -> Many Viewing History
- One Netflix Content -> Many Viewing History



45:09
SUB TOPIC Part 3

SQL Concepts Used :

- ❑ *Joins*
- ❑ *Aggregations*
- ❑ *Window functions*
- ❑ *Subquery*
- ❑ *Ranking Functions*
- ❑ *Case Expressions*

45:09
SUB TOPIC Part 4

Top 10 Most Engaging Shows

Goal: *Find shows with highest watch time.*

SQL Concepts:

- *JOIN*
- *GROUP BY*
- *SUM()*
- *ORDER BY*

Insight:
Top shows drive user engagement and retention.

45:09

SUB TOPIC Part 5

Rank Customers by Engagement

Goal: *Identify most active users.*

SQL Concepts:

- *Window Function → RANK()*

Insight:
Few power users contribute majority of watch time.

45:09
SUB TOPIC Part 5

Monthly Watch Time Growth

Goal: *Track platform growth over time.*

SQL Concepts:

- *Subquery*
- *LAG() Window Function*

Insight:
Shows month-over-month engagement growth.

45:09

SUB TOPIC Part 5

Top Show in Each Genre

Goal: *Find best content per genre.*

SQL Concepts:

- *PARTITION BY*
- *Window Ranking*

Insight:
Helps Netflix invest in best performing genres.

45:09

SUB TOPIC Part 5

Customer Lifetime Value (CLV)

Goal: *Calculate total revenue per customer.*

SQL Concepts:

- *JOIN*
- *SUM()*

Insight:
Identifies high-value customers.

45:09
SUB TOPIC Part 5

Identify Binge Watchers

Goal: *Find users watching >2 hours/day.*

SQL Concepts:

- *GROUP BY*
- *HAVING*

Insight:
Binge watchers are highly engaged users.

45:09
SUB TOPIC Part 5

Cancellation Rate

Goal: *Measure customer churn.*

SQL Concepts:

- *CASE*
- *Aggregation*

Insight:
Shows percentage of users leaving the platform.

45:09
SUB TOPIC Part 5

Conclusion

- ❑ *SQL used to analyze user behaviour and engagement*
- ❑ *Identified top performing shows and genres*
- ❑ *Ranked customers based on watch activity*
- ❑ *Measured monthly platform growth*
- ❑ *Calculated customer lifetime value (CLV)*
- ❑ *Identified binge watchers and churn rate*
- ❑ *Generated business insights for decision making*

- "SQL analytics helps Netflix understand users, improve content strategy, and increase revenue."
